

Mortality Equations for CONUS: Red Maple

Greg Johnson, David Marshall, Aaron Weiskittel

2026-05-01

Data

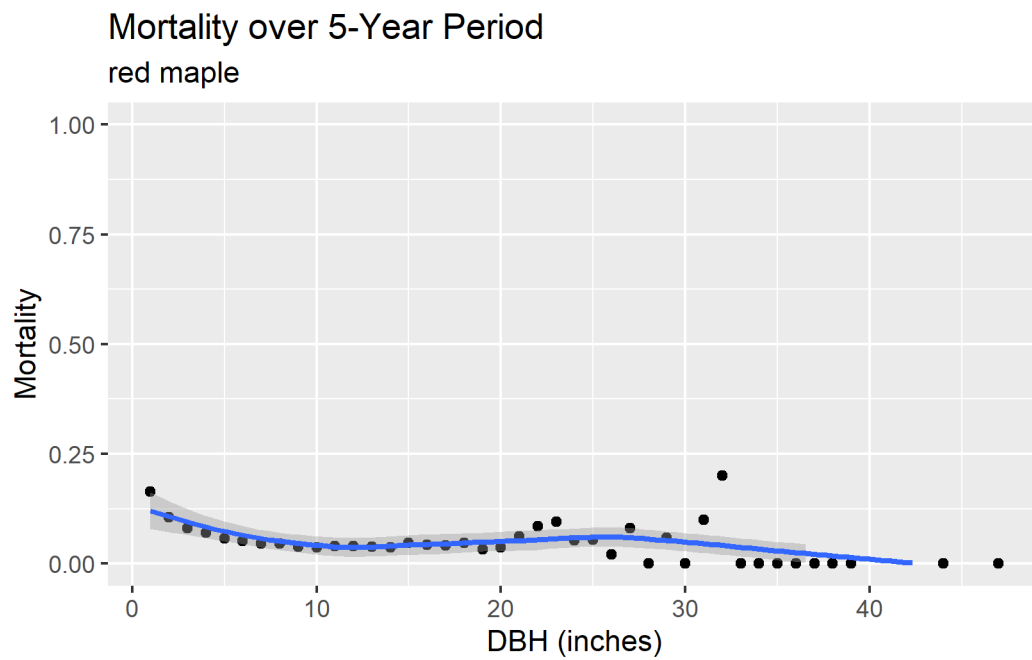

We took the FIA mortality data subset for red maple, filtered FIA plot locations with missing EPA L3 Codes. This left 342769 observations.

The observations are distributed among states as follows:

State	n
ME	42630
MI	41461
WI	40373
PA	35981
NY	29170
MN	16515
NC	14567
VA	14016
WV	11345
TN	10736
NH	10697
KY	9335
GA	8879
OH	7267
VT	6705
SC	6445
MA	5929
AL	5679
MS	3982
AR	3112
CT	2773
MD	2343

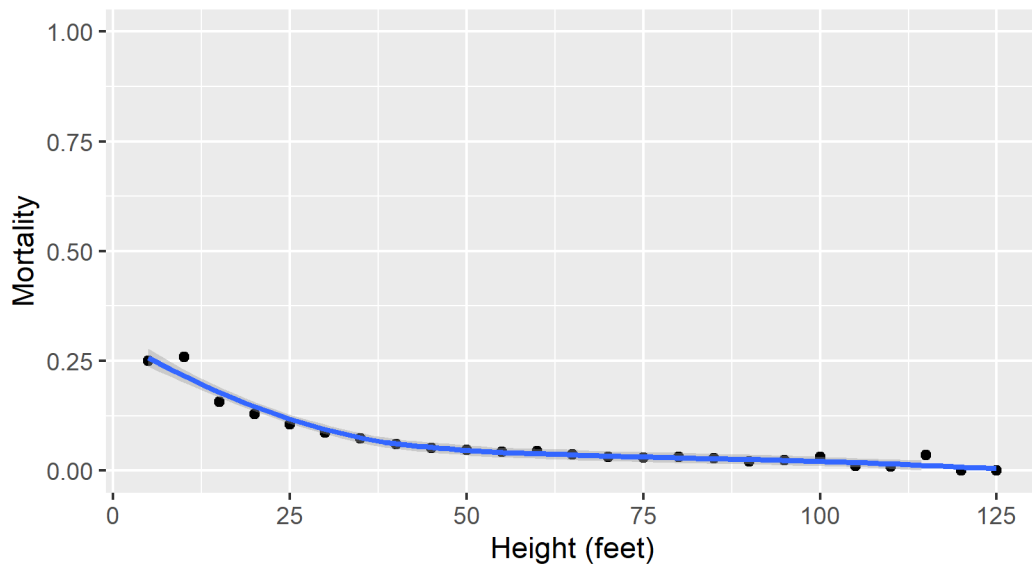

State	n
IN	2319
NJ	2067
LA	1524
TX	1420
MO	1396
RI	1329
DE	1046
FL	724
IL	518
OK	486

We computed the fraction of trees dying over a 5-year period (the interval with the most observations) for classes of explanatory variables. The graphs of mean mortality are below:

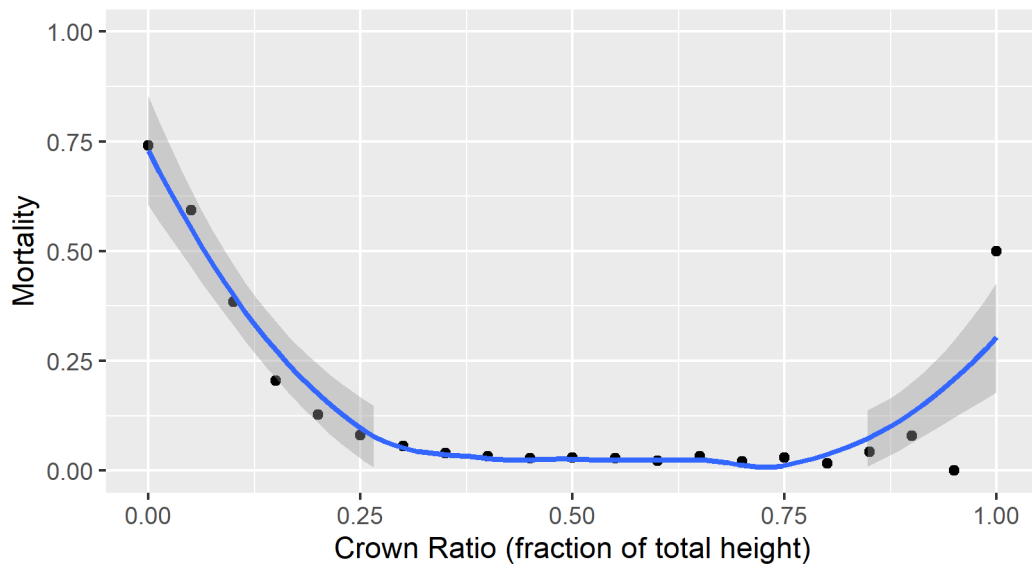

Mortality over 5-Year Period

red maple

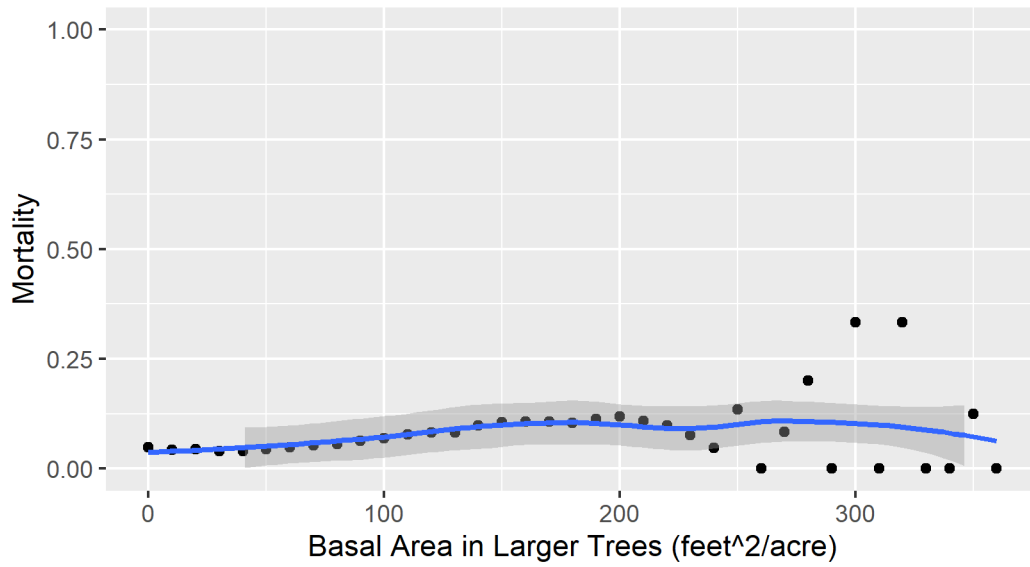

Mortality over 5-Year Period
